FORMAL SCOPE OF WORK & PRODUCT BLUEPRINT

The Digital Discipleship Platform

A day in the life of a parishioner, and the technical specification behind it.
Prepared for **Metro D.C. Synod** leadership & the technical development team.

DOCUMENT	TRACES TO	SCOPE COVERAGE
Version 1.0 — Final	Proposal, 10 Mar 2026	7 of 7 sections

AT A GLANCE

The whole platform in five numbers

Five acts, one parishioner journey, one central control room. Everything below traces back to a numbered section of your original proposal.

5
Life Role tracks: Worker, Parent, Student, Senior, Beginner

5
Permanent habit pillars, adapted per role

7
Max members per small group, led by one Anchor

70+
Parishes managed from one CSV upload

Parishioner app · Admin portal

Acts I–IV run on **mobile + web** for parishioners (English & Spanish). Act V — the Diocesan Admin Panel — is **web only** for Central Office.

Grace, not guilt

The dashboard opens to **what's right for this moment** — not unfinished morning tasks at lunch. Streaks use the Rule of Two; missed days show a 🍃 leaf, never a broken chain.

Fenced AI, source-grounded

The AI Guide never browses the internet. It answers only from PDFs your theological staff upload — and can answer in Spanish from English sources.

SYSTEM FLOW

How the whole platform works

One admin portal publishes. The parishioner experience consumes. Five acts, connected.

WEB ONLY

V

The Shepherd's Desk

Central Office admin portal — the source of truth for the whole system.

- Schedules daily content
- Uploads AI PDFs
- Syncs parish map
- Sends alerts
- Reviews analytics

PUBLISHES INTO

MOBILE + WEB

The parishioner journey

What Alex moves through after Central Office has published.

I **Finding Home** — Joins & gets set up

→ II **The Daily Walk** — Opens to the current moment

→ III **The Gathering** — Joins a group via code

→ IV **The Safe Teacher** — Asks the AI

MASTER SCOPE TRACEABILITY MATRIX

Every proposal requirement, accounted for

A 1-to-1 cross-reference proving that every requirement from the original **Formal Proposal & Scope of Work (10 Mar 2026)** is delivered in this specification.

#	PROPOSAL SECTION (10 MAR)	CORE FEATURE IN ORIGINAL PROPOSAL	DELIVERED IN
1	**User Authentication & Onboarding** p. 3–4	Sign-up, language selection, Parish Finder map, State of Life tracks.	Act I — Flow 1

2	**The Daily Dashboard (Home Screen)** p. 4–5	Liturgical calendar header, progress ring, distraction-free UI, **adaptive time-of-day (dayparting)** home screen.	Act II — Flow 2 (C)
3	**Spiritual Content Feed (“Daily Bread”)** p. 5	Bishop's audio reflection, scripture reader, persistent audio player, offline support.	Act II — Flow 2 (A)
4	**The “Digital Catechist” (Lutheran AI)** p. 5–6	Fenced AI knowledge base (Catechism & pastoral letters), theological guardrails (RAG).	Act IV — Flow 4
5	**Customizable Habit Tracker** p. 6	Disciple's Menu, daily check-in UI, streak logic without shaming.	Act II — Flow 2 (B & D)
6	**Basic Fraternity & Accountability** p. 6	Small groups (up to 7 people), Anchor system, Sunday weekly review form, group dashboard.	Act III — Flow 3
7	**The Diocesan Admin Panel (Web only)** p. 6–7	CMS for media & readings, AI document manager, parish CSV importer, push alerts, user analytics.	Act V — Flow 5

Act I · Flow 1

Finding Home — onboarding & personalization

Fulfils **Section 1: User Authentication & Onboarding (p. 3–4)**. Flow 1 walks a new member from download to Day 1.

Flow 1 — New member onboarding experience

Step 1

Launch & account creation

Alex downloads the app and registers securely using one of two paths:

Google | Email / Password

- **Profile photo upload** — Alex can add a profile picture during account creation.
- **Forgot Password** — standard self-service recovery ensures seamless account access.
- **Guest mode is disabled** — deliberately, to protect community safety and preserve streak data.

Step 2

Language preference selection

Alex selects **English**, with full native support for **Spanish**. The interface, lectionary readings, and AI responses all switch immediately.

Step 3

Parish selection via geolocation map (Parish Finder)

With GPS enabled, the interactive map shows pins for nearby congregations so Alex can select his parish.

Step 4

State of Life (Life Role track) selection

The app asks: *"Where do you spend the majority of your energy?"*

💼 Worker / Professional | 👶 Parent / Caregiver | 🎓 Student / Youth | 🕰️ Senior Citizen | 🌱 Beginner

Alex selects **Office Worker / Professional**. The daily habits immediately adapt to workplace stress and ethical leadership. (The five short labels used across the app are Worker, Parent, Student, Senior, Beginner.)

Step 5

Setting the rhythm (notification windows)

Alex sets their commute reminder for **7:30 AM** and their evening wind-down for **8:30 PM**.

Step 6

Arrival on dashboard

Day 1 opens on the **current time-of-day window** (not a full-day checklist), with a reassuring message of grace: **"Take it one day at a time. This is not a test."**

Act II · Flow 2

The 24-hour walk of faith

Fulfils **Section 2 (Daily Dashboard, p. 4–5)**, **Section 3 (Spiritual Content Feed / "Daily Bread", p. 5)** and **Section 5 (Customizable Habit Tracker, p. 6)**. Daily habit loop with no-guilt streaks.

A. The daily chronological journey

Notification times are the ones Alex chose during onboarding (Flow 1 Step 5) — in this story, **7:30 AM** commute and **8:30 PM** evening wind-down.

> **How the screen follows the clock:** each block below maps to a dashboard window the app opens to automatically (see Section C). Alex never opens the app to a checklist of things already missed — only to what belongs to this moment. Past content stays available via swipe-back / "Earlier today."

7:30 AM

Morning Reminder

Push notification arrives at Alex's set morning window:

> PUSH · MORNING
>
> ☀️ Today's Reflection is Ready — Take 3 minutes to center your morning. Tap to listen.

Tapping the notification **deep-links directly into the audio player**.

7:45 AM

Morning commute — the Bishop's audio + Spotify

Alex opens into the **Morning** window, plays the 3-minute Bishop reflection on the sticky player, and can continue the commute with the Synod Spotify companion link.

12:30 PM

Midday break — Daily Scripture Reader & Habits

The dashboard has rolled to **Midday**. Alex reads the daily NRSVUE lesson and works the Disciple's Menu — in today's story he checks off 2 workplace habits (enough for the Rule of Two), though all 5 stay available.

8:30 PM

Evening Reminder → check-in

Push notification arrives at Alex's set evening window:

> PUSH · EVENING
>
> 🌙 Evening Wind-Down — Take 30 seconds to reflect. How was your day?

- Tapping the notification **deep-links directly to the check-in screen**.
- The evening check-in window runs from **7:00 PM to 3:59 AM**.
- Alex selects a mood status — 🟢 **Good** / 🟡 **Tough** / ⚪ **Rest** — and optionally writes a **Private 1-Sentence Note** (strict **280-character cap / ~50 words**).

3:59 AM

Day officially closes

Grace-based streak evaluation updates. Notes & checks remain **encrypted on the phone for the current month**.

B. The "No-Guilt" Streak Engine

Implements the mandate in Section 5 (p. 6) for *"streak logic to encourage consistency without shaming."* Four rules — how a day is scored, then how the calendar and month keep score without guilt.

🟢 Yes → Day Complete

Rule of Two: there are always **5 habits** on the Disciple's Menu. Checking **any 2** — *or* finishing the 2-minute daily reading — earns the 🟢 Complete badge and Monthly total **+1**. Alex may check all 5; "2" is the floor that marks success, not a ceiling.

Met Rule of Two?

Busy day / sickness is OK

🍃 No → Rest Day

Zero guilt, no penalty. The calendar shows a peaceful green leaf (🍃) — never a red X or broken chain.

The 4:00 AM Cutoff

The operational day runs from **4:00 AM to 3:59 AM**. Shift workers and night owls reflecting at 1:15 AM receive full credit for the day just completed.

Monthly consistency over fragile chains

Progress is measured cumulatively — e.g. **"22 / 25 Days Active this Month (88% Consistency)"** — eliminating the anxiety of starting from zero.

C. The Adaptive "Time-of-Day" Dashboard (Dayparting)

Refines Section 2's mandate for a clean, distraction-free home screen. Principle: **"Meet the parishioner where they are, right now."** The home screen is one composition: chrome that is always present, plus content that steps forward by time of day. Past windows recede quietly — never as unfinished, guilt-inducing tasks.

WINDOW	TIME RANGE	OPENS TO	WHAT RECEDES
☀️ **Morning**	4:00 AM – 12:29 PM	3-minute audio + Spotify companion link	Reading & check-in sit in a quiet "Later today" strip
🕛 **Midday**	12:30 PM – 8:29 PM	Daily scripture + the 5 daily habits	Morning audio moves into the "Earlier today" swipe-back card
🌙 **Evening**	8:30 PM – 3:59 AM	Mood check-in (🟢 / 🟡 / ⚪) + private 280-character note	Audio & reading move into the "Earlier today" swipe-back card

☀️ MORNING

4:00 AM – 12:29 PM

7:45

☀️ **Good Morning, Alex**

📅 Friday, October 12

🕊️ Friday of the Third Week of Lent

● **Morning** · Midday · Evening

📅 OCTOBER JOURNEY

22 / 25 Days Active 88%

🎵 BISHOP'S CORNER

▶ Play 3-min reflection

🎵 Listen on Spotify

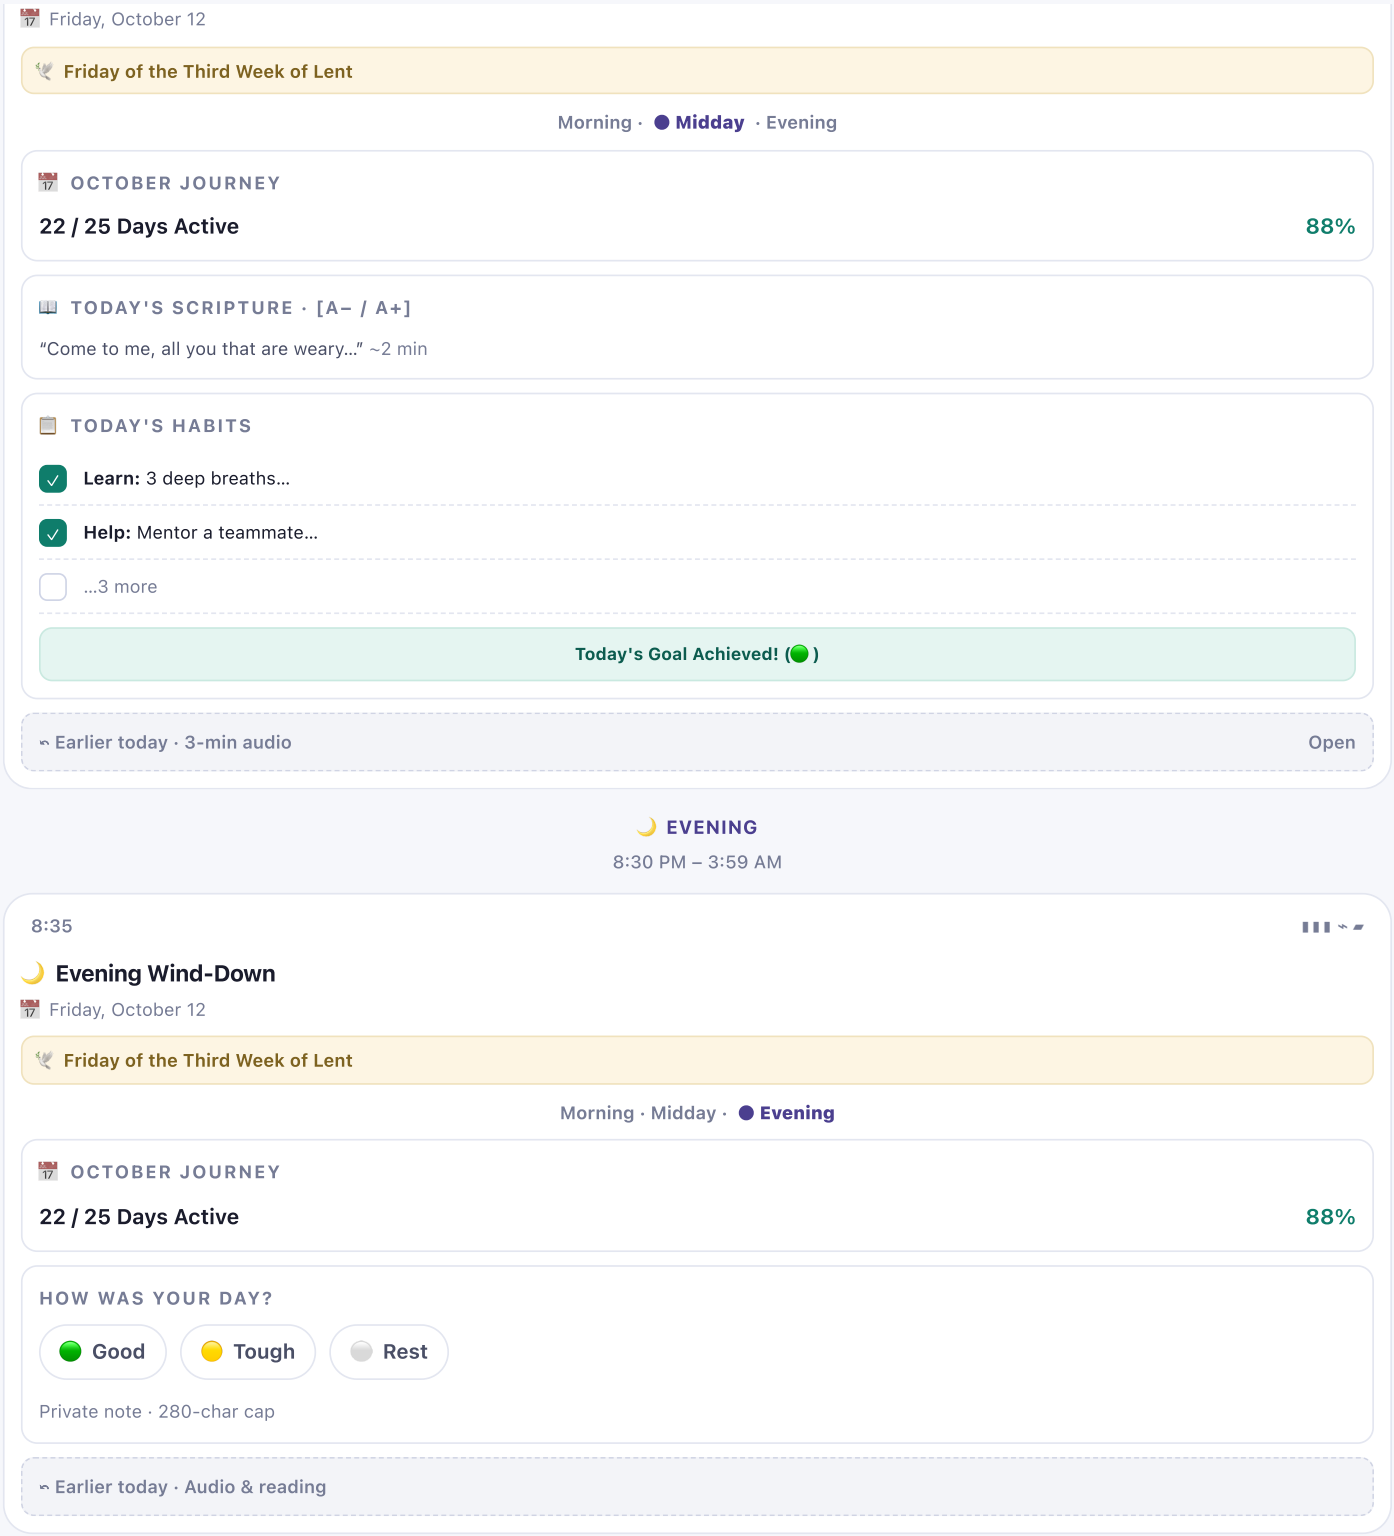

Later today · Scripture & habits

🕛 MIDDAY

12:30 PM – 8:29 PM

12:40

🕛 **Good Afternoon, Alex**

Same home chrome in every window; only the primary content block changes with the clock.

Always on the home screen

These elements stay visible in Morning, Midday, and Evening. Dayparting never hides them.

- **Liturgical Calendar Header** — injected by staff via the Web CMS (e.g. "Friday of the Third Week of Lent"), orienting Alex to the Church calendar.
- **Instant tactile feedback** — the moment the Rule of Two is met (e.g. ticking the second habit, or finishing the reading), a gentle haptic vibration fires and the progress ring turns bright green: *"Today's Goal Achieved! (🟢)"*.

- **Progress Ring & Ratio** — "22 / 25 Days Active" with the consistency percentage, always visible near the top of the home screen.
- **Monthly Journey Calendar** — tapping the progress widget expands a 30-day calendar of green dots and rest leaves. Tapping a past day reveals that day's checkboxes and private notes.
- **Distraction-Free UI** — one screen, one day, no feeds or noise. Content that belongs to another window is reachable via "Earlier today" / "Later today," not as a second competing agenda.

Content that steps forward by time of day

☀️ Morning

- **Persistent / sticky audio player** — the Bishop's 3-minute reflection keeps playing while Alex scrolls; he can download it from the player for offline listening.
- **Spotify Companion Link** — exact CTA: *"Listen to our curated playlist on Spotify."*

🕛 Midday

- **NRSVUE Scripture Reader** — daily lectionary excerpt with **[A– / A+]** font controls (~2-minute lesson).
- **5 Daily Habits checklist** — all five stay on the Disciple's Menu every day; checking any two (or finishing the reading) completes the day under the Rule of Two (Section B).

🌙 Evening

- **Mood check-in** — 🟢 Good / 🟡 Tough / ⚪ Rest.
- **Private note** — optional, strict 280-character cap.

How the windows behave

- **Always opens on "now"** — launch lands on the window matching the device's current local time.
- **Swipe-back catch-up** — earlier content is never deleted. Swipe or tap "Earlier today" (e.g. play morning audio at 3 PM); completing it still counts.
- **Zero-guilt styling** — past windows render in neutral grey. No red badges, no incomplete counters.
- **Live roll-over** — if the app is open when a boundary hits (e.g. 12:30 PM), the dashboard gently animates to the next window.
- **Scoring is separate** — Rule of Two and the 4:00 AM cutoff (Section B) decide credit. Dayparting only decides what is foregrounded.

Privacy by design: notes & checks are encrypted on the phone for the current month. The private 280-character note is never shown to the group — only the mood status dot is shared.

D. The 5 Habit Themes across Life Roles (The Disciple's Menu)

The 5 habit categories remain **permanent pillars** across the app, while the daily actions adapt to each Life Role. Every role always sees all five; the Rule of Two only decides when the day counts as Complete.

💼 **Worker** · Professional

1. **Learn & Center** — 3 deep breaths before email
2. **Help Someone** — Mentor a junior colleague
3. **Stand for Fairness** — Fair credit in meetings
4. **Spread Good** — Forgive an annoying email
5. **Connect** — Lunch away from desk

👶 **Parent** · Caregiver

1. **Learn & Center** — 2 min morning quiet
2. **Help Someone** — 15 min undivided play
3. **Stand for Fairness** — Teach playground empathy
4. **Spread Good** — Unconditional love reminder
5. **Connect** — Check in with a parent

🎓 **Student** · Youth

1. **Learn & Center** — Mindful exam pause
2. **Help Someone** — Invite lonely peer to lunch
3. **Stand for Fairness** — Support campus cause
4. **Spread Good** — Compliment anxious peer
5. **Connect** — Campus group meetup

🕰️ **Senior** · Senior Citizen

1. **Learn & Center** — Quiet morning reflection
2. **Help Someone** — Call homebound friend
3. **Stand for Fairness** — Support local food pantry
4. **Spread Good** — Share life wisdom
5. **Connect** — Community social hour

🌱 **Beginner**

1. **Learn & Center** — Read 1-min core values
2. **Help Someone** — Small act of kindness
3. **Stand for Fairness** — Explore local charity
4. **Spread Good** — Note of appreciation
5. **Connect** — Branch open-house

Act III · Flow 3

The Gathering — small groups & Anchor accountability

Fulfils **Section 6: Basic Fraternity & Accountability (p. 6)**. Groups are formed with a simple 6-character code. The group dashboard is an **offline trigger**: status dots prompt a real phone call or lunch — not an in-app chat feed.

Group formation & the Anchor role

- Groups are capped at a **maximum of 7 people** to maintain intimacy and trust.
- **The Group Anchor** (Marcus) acts as the spiritual facilitator with administrative oversight:

- **Pinned "Thought of the Day"** — Marcus posts a short reflection (**max 200 characters**) pinned at the top of the dashboard. Anchor-only **[✏️ Edit Message]**.
- **Roster moderation** — Marcus can remove any member via a **[⋮]** menu to reopen invite slots under the 7-person limit.

The 6-character code-only join flow

Groups are created and joined strictly via a simple **6-character code** — no complex web links or redirects.

How the Creator (Anchor) forms a group

- In the **Community** tab, taps **"Create Small Group"**.
- Enters a group name.
- The app assigns them as the **Anchor** and generates a unique 6-character code (e.g. **CAP-789**).
- The Anchor shares the code with up to **6 friends outside the app** — by text, call, or word of mouth. There is no in-app invite or share flow.

How members join

- In the **Community** tab, taps **"Join with Code"**.
- Enters the code (e.g. **CAP-789**).
- Sees a confirmation modal: *"Join 'Capitol Hill Cohort' (Anchor: Marcus)?"*
- Confirms and is added to the group immediately.

JOIN FLOW

1 · Create

Creator taps **"Create Group"** → gets code **CAP-789** → shares it **outside the app** (text / word of mouth).

2 · Enter code

Friend opens app → taps **"Join with Code"** → enters **CAP-789**.

3 · Confirm

Modal: *"Join Capitol Hill Cohort (Anchor: Marcus)?"* → 🟢 **Confirmed: Added to Group!**

Guardrails & rules

7-member hard cap

If an 8th person enters the code, entry is blocked: *"This group has reached its maximum capacity of 7 members."*

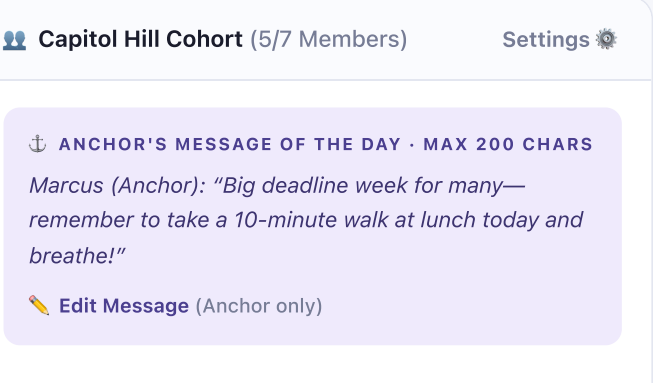

Single active group

Users can belong to **only one active group** at a time.

The Group Dashboard (The Offline Trigger)

- Daily **member status dots** show who has checked in (🟢), who needs support (🟡), and who hasn't checked in (⚪).
- Those dots are the cue to reach out offline — a phone call or lunch — not an in-app chat feed.
- Private evening notes are **never** visible here; only the mood / status signal is shared.

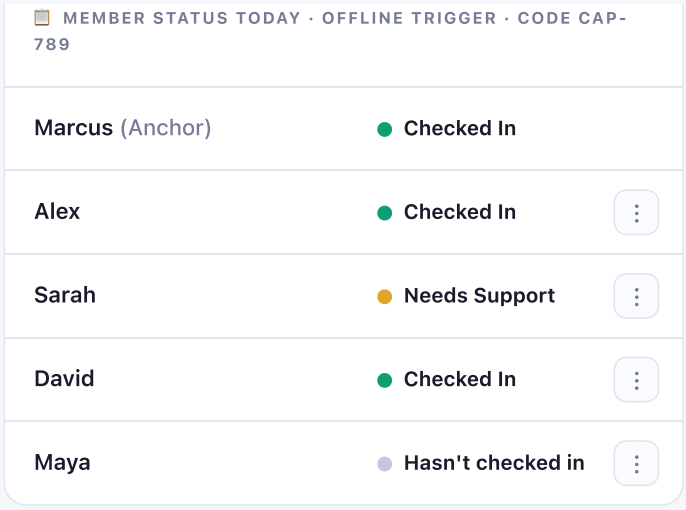

Sunday Weekly Review Form & Feed

Unlocks every **Sunday at 8:00 AM** with 3 structured questions:

- Where did I struggle this week?
- Where did I experience gratitude or God's grace?
- What is my spiritual focus for next week?

7-Day Visibility: submitted answers remain visible on the group dashboard all week (the weekly review feed), giving group members meaningful topics for Sunday fellowship.

The ⋮ menu on any member lets the Anchor remove them and reopen a slot under the 7-person cap.

Act IV · Flow 4

The Safe Companion — the Smart AI Guide

Fulfils **Section 4: The "Digital Catechist" Lutheran AI Assistant (p. 5–6)**. Source-grounded Q&A — Alex asks a theological question; the AI searches only approved Synod PDFs & the Catechism with guardrails.

🔒 Fenced AI Knowledge Base (RAG Architecture)

The AI **does not browse the public internet**. It strictly queries verified PDF documents uploaded by the Synod theological staff — including Luther's Small Catechism, Synod Constitution/Bylaws, and active Social Statements / pastoral letters.

🛡️ Theological Guardrails

If Alex asks an out-of-scope question (e.g. political voting advice or stock tips), the AI politely declines: *"I am only trained to assist you with our community guidelines, Lutheran teachings, and daily reflections."*

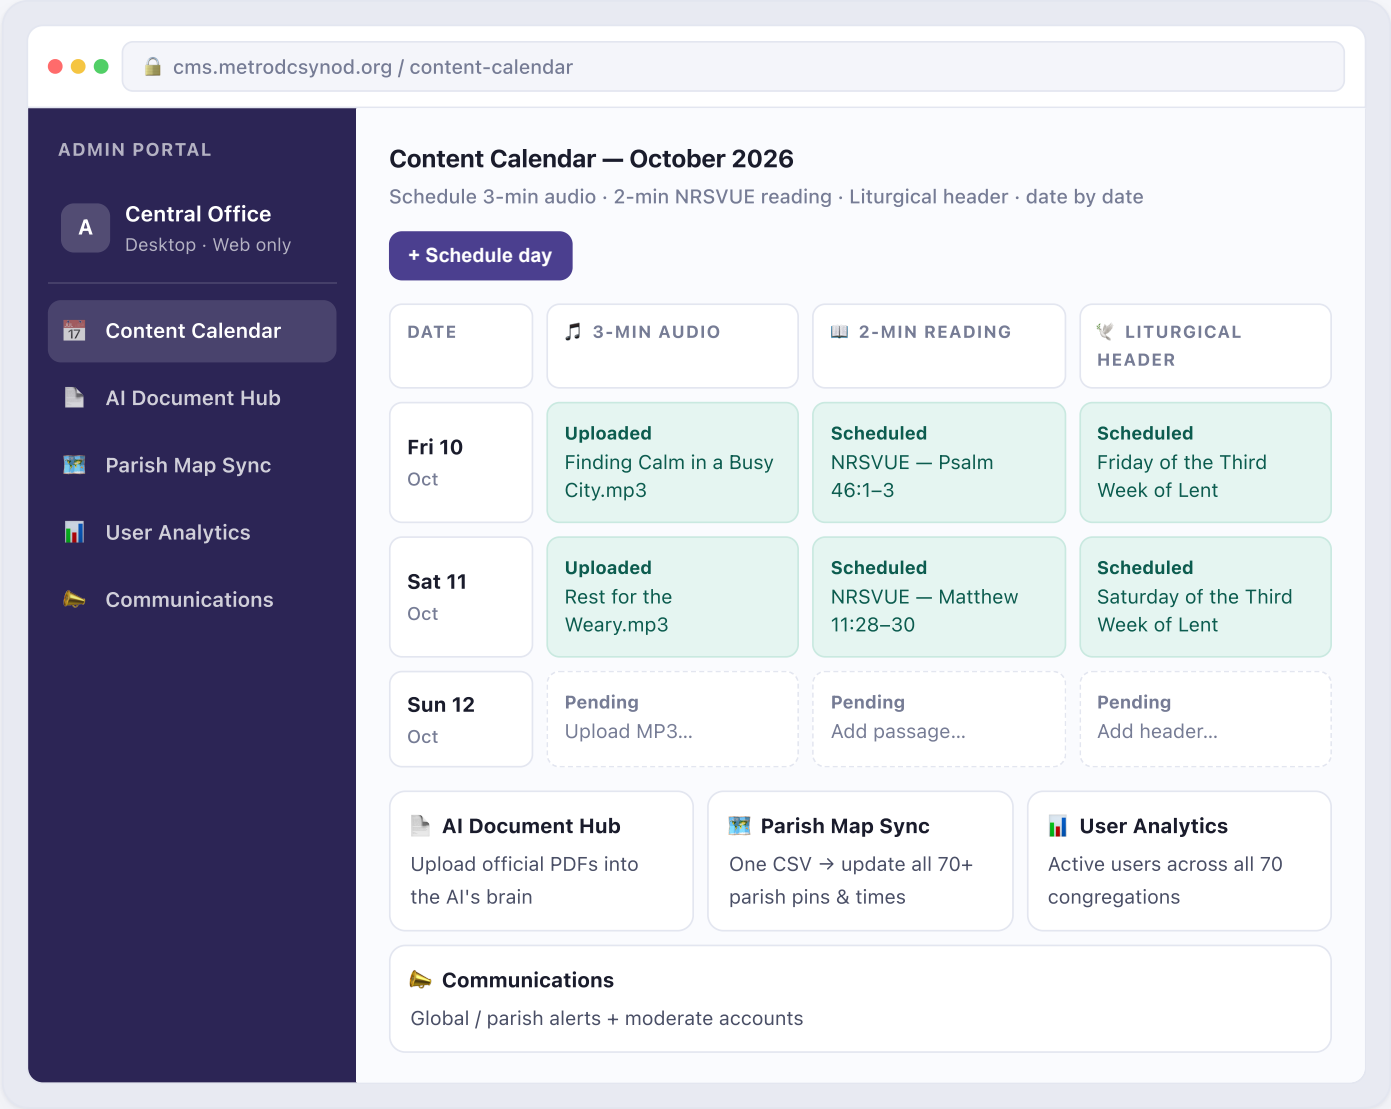

🌐 Cross-Lingual Intelligence

If Synod staff uploads a Social Statement in English, and a native Spanish speaker asks a question in Spanish, the AI reads the English theology and answers in **natural, fluent Spanish**.

Act V · Flow 5

The Shepherd's Control Center — Central Office Web CMS

Fulfils **Section 7: The Diocesan Admin Panel (Web Only) (p. 6–7)**. One desktop admin portal. Five modules drive everything parishioners see.

Indicative Central Office admin portal — Content Calendar open; the other four modules sit in the left nav.

MODULE	WHAT THE ADMIN PORTAL DOES
Content Calendar Scheduler English & Spanish	Staff uploads **MP3 audio files weeks in advance**. **Daily Scripture Upload (NRSVUE):** schedules the daily passage text and reference directly on the content calendar. By scheduling passages date-by-date, the Synod team can walk parishioners through whole books of the Bible sequentially from start to finish. **Daily Liturgical Header Field:** staff schedules the custom seasonal label date-by-date on the same content calendar (e.g. “Friday of the Third Week of Lent”), which populates all mobile app headers — same calendar workflow as the 3-min audio and 2-min reading.
AI Document Center / Hub	Whatever Central Office wants parishioners to learn from — catechism, constitution, social statements, pastoral letters — gets uploaded as PDFs here. Once uploaded, users can chat with the AI Guide about those documents. The AI only answers from what has been uploaded; it does not browse the open internet.

🗺️ **Parish Directory Importer / Map Sync** English & Spanish	Uploading a **single CSV spreadsheet** updates pins, worship times, and pastor contacts for all congregations (70+ parish locations & times).
📣 **Targeted Push Notifications / Communications**	**Global Alerts:** sent to all regional members (e.g. “Synod Assembly live stream starts at 10 AM”). **Parish Alerts:** filtered to a specific congregation (e.g. “Capitol Hill cleanup postponed”).
📊 **User Analytics & Roster Moderation**	Displays high-level adoption metrics: **Total Active Users** and a **Congregation Breakdown** (e.g. “St. John's has 220 active users”) across all 70 congregations. Allows staff to audit and remove accounts as needed to ensure data health.

CLIENT DELIVERABLES & DATA DEPENDENCIES

What we need from the Synod

To ensure an on-time deployment, the development team requires the following assets and data from Synod staff.

1 · Initial Content Seed Pack

ASSET	DETAIL REQUIRED	LANGUAGES
Parish / Congregation Directory Excel or CSV	Columns: Parish Name, Full Address, City, State, ZIP, Pastor/Deacon Name, Primary Sunday Service Times, Website URL, and Primary Languages Spoken.	EN & ES
🎧 **Curated Spotify Playlist URL**	The public share link / deep-link URL for the Synod's curated Spotify playlist (hymns, worship, meditation).	One link
AI Knowledge Base Launch Pack PDFs	The approved theological documents the AI Guide is permitted to reference: **Luther's Small Catechism**, **Synod Constitution/Bylaws**, and active **Social Statements** (e.g. Caring for Creation, Racial Justice).	As available
Daily Habit Prompt Bank Approval	The development team will supply an initial seed bank of **~75 curated daily habits** across the 5 Life Roles. The Synod communications team reviews and approves the wording.	EN & ES
Launch Audio Reflections & NRSVUE readings First 30 Days	**30 audio recordings** (MP3, 3 minutes each) and NRSVUE readings from the Bishop or appointed clergy. English and Spanish files.	EN & ES

3 · Ongoing Operational Responsibility (Post-Launch)

Numbering follows the source document (section 2 is not used in the original pack).

Weekly Audio Ingestion

Staff uploads upcoming reflections via the Web CMS content calendar — scheduling the **3-min audio**, the **2-min NRSVUE reading**, and the **Daily Liturgical Header** date-by-date.

Community Oversight

Periodic review of users and removal of accounts as decided by Central Office.

Document Version 1.0 — Final Story-Driven Scope of Work.
Prepared for Metro D.C. Synod Leadership & Technical Development Team.
Traces to the Formal Proposal & Scope of Work dated 10 March 2026.
